

ILYAS HAMMOUTI

Internship application: 6 months from January 2027 | Nat Cat, exposure and geospatial risk

Paris, France | +33 6 63 47 31 84 | ilyas@hammouti.me

ilyas.hammouti.me | linkedin.com/in/ilyas-hammouti | github.com/IlyasHammouti

French citizen (EU) | Driving licence B | Available from January 2027 for 6 months (university internship agreement)

PROFILE

Master's student in natural hazards and risk (Dynamisk, Université Paris 1 Panthéon-Sorbonne), trained in geomorphology, hydrology and natural hazard analysis, specialised in GIS and remote sensing. Through my project Hazard Watch, I produce and publish modelled loss estimates for real catastrophe events, from hazard footprint to exposure, vulnerability and loss. I am looking for a six-month internship in nat cat, exposure management or climate risk, to contribute geospatial data processing, hazard and exposure mapping, and clear reporting.

PROJECTS

HAZARD WATCH, natural catastrophe loss estimation (personal project) *since August 2026*

- End-to-end multi-hazard catastrophe modelling chain: hazard footprint, exposure, vulnerability, modelled loss
- Footprints from Copernicus Global Flood Monitoring, Sentinel-1/2 and Copernicus EMS Rapid Mapping; exposure from JRC GHSL and LitPop (CLIMADA, ETH Zurich); damage from EMS grading or published depth-damage curves
- Weekly digest published every Monday since September 2026: damage mapping, human, physical and financial toll, with sources and method stated in every issue

Geography YouTube channel, Ilyas – INO GEO *since March 2024*

- Independent production of GIS tutorials and science outreach videos, from scripting to publishing

EDUCATION

MSc Environmental Dynamics and Risks (Dynamisk) *Université Paris 1 Panthéon-Sorbonne | 2025 - 2027*

- Geomorphology, hydrology, climatology and natural hazard analysis
- GIS and remote sensing applied to hazard characterisation and mapping
- Fieldwork: wildfire hazard mapping downscaled to municipal level (Cévennes, Sept. 2026); post-restoration river study (Yerres, Sept. 2026); GNSS topographic survey and sediment coring (Jura, Oct. 2025)
- First-year thesis: geomorphology of Mount Dempo (Sumatra, Indonesia), mapping surface deposits and slope processes from Sentinel-1/2 imagery and the DEMNAS DEM. Supervisors: F. Lavigne, A. Faral, Y. Chabot

Exchange semester, physical geography *Universitas Gadjah Mada (UGM), Yogyakarta, Indonesia | Feb - Jun 2025 | 18.6/20*

- Coursework entirely in English, in a region highly exposed to volcanic and seismic hazards

BSc Geography and Planning, Environment track *Université Paris 1 Panthéon-Sorbonne | 2025 | 14.5/20*

- GIS, spatial analysis, territorial diagnostics and fieldwork
- Environment track, including environmental impact assessment

PROFESSIONAL EXPERIENCE

Cartographer *GEOFIT, Montpellier, France | Jun - Aug 2024*

- Interpretation of Pléiades Neo very-high-resolution satellite imagery (Airbus, Thales) in a national defence context
- Digitisation of building footprints from orthophotos (MicroStation)
- Quality control and validation of mapping data produced by the team

Project Manager *Sorbonne Junior Conseil (student consultancy), Paris | Oct 2025 - Jul 2026*

- Business development with Paris-region municipalities and real-estate agencies, including a campaign on regulatory flood-risk information documents (DICRIM)
- Drafted technical and commercial proposals and led negotiations
- Represented the association at professional events

SKILLS

GIS & remote sensing: ArcGIS Pro, QGIS, Google Earth Engine, MicroStation, DEM processing, Sentinel-1/2 and Pléiades imagery

Catastrophe risk: hazard, exposure and vulnerability data (Copernicus EMS, JRC GHSL, LitPop), loss estimation workflow built on CLIMADA

Data & field: spatial analysis, thematic mapping, Excel, RStudio, GNSS topographic survey, field validation

Communication: reports, maps, oral presentations, video production, Illustrator, InDesign

LANGUAGES

English B2 (TOEFL 2024) · French (native) · German (currently learning) · Spanish B1

CERTIFICATIONS

French National Student-Entrepreneur Status (Pépité HESAM Entreprendre)

Esri MOOCs: The ArcGIS Imagery MOOC (Foundations and Frontiers) · Going Places with Spatial Analysis

REFERENCE

Alex de Sá, Product Owner at IGN and remote sensing lecturer at Paris 1 (recommendation letter on request)

INTERESTS

Semi-professional photography and drone imaging · Mountain biking · Basketball · Muay Thai
